RE: Sustainability Statement

Babcock-Davis certifies and provides the following information for use in achieving LEED v4 credit for the specification of Babcock-Davis Access Doors and Panels.

Product: Un-insulated Fire-rated Access Doors
Model(s): BUT, BUW, BUP

Manufacturing Info
- Final Assembly Location: Brooklyn Park, MN
- Extraction point is not within 500 miles of manufacturing

LEED Credit Options
- MR Credit: Building Product Disclosure and Optimization – Material Ingredients
  - Option 1. Material Ingredient Reporting (1 point) Use at least 20 different permanently installed products from at least five different manufacturers that use any of the following programs to demonstrate the chemical inventory of the product to at least 0.1% (1000 ppm). (10 different permanently installed products from at least three different manufacturers for CS and Warehouses & Distribution Centers)
    - Health Product Declaration. The end use product has a published and complete Health Product Declaration with full disclosure of known hazards in compliance with the Health Product Declaration open Standard.

If you require any further information, please do not hesitate to contact us at (888) 312-3726.
Uninsulated Fire-Rated Access Doors
by Babcock-Davis

CLASSIFICATION: 08 31 00 Openings: Access Doors and Panels

PRODUCT DESCRIPTION: Babcock-Davis' Uninsulated Fire Rated Access Doors are a cost effective access solution for fire-rated walls. UL Listed "B" label for 1-1/2 hours, these doors do not carry the temperature rise rating. This HPD covers Babcock-Davis' Uninsulated Fire-Rated Access Doors (BUT,BUW,BUP) with standard features. Optional accessories are included in Section 4: Accessories.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1.1, available on the HPDC website at: [www.hpd-collaborative.org/hpd-2-1-1-standard](http://www.hpd-collaborative.org/hpd-2-1-1-standard)

**UNINSULATED FIRE-RATED ACCESS DOORS**

**PRODUCT THRESHOLD:** 1000 ppm

**RESIDUALS AND IMPURITIES CONSIDERED:** Yes

**RESIDUALS AND IMPURITIES NOTES:** Residuals and Impurities were considered by following the suggestions of Emerging Best Practices. Approximately 99% of this product consists of metal alloys, for which Pharos CML considers the various alloying elements as "Known or Potential Residuals". Thus, these components have been included in the Substance Notes instead of as individual content entries, with components listed by name, CASRN, percent by weight (as per supplier SDS), and relevant GreenScreen score.

**OTHER PRODUCT NOTES:** Percent by weight of substances given as ranges to account for material differences between product lines.

No warnings found on HPD Priority Hazard Lists

**SUBSTANCE NOTES:** Standard door and frame, spring, bracket, hinge, latch, mixed hardware. Alternate door and frame available in stainless steel. Recycled content confirmed by suppliers for steel used in product ranges from 18.5% total (14.0% pre-consumer and 4.5% post-consumer recycled scrap) to 97.8% total (36.5% pre-consumer and 61.3% post-consumer recycled scrap). Documentation from supplier provides the following composition for alloying elements that may individually exceed the declared threshold: max 3.1% Silicon [7440-21-3; LT-UNK]; max 2.5% Manganese [7439-96-5; LT-P1]; max 1.6% Aluminum [7429-90-5; LT-P1]; max 1.8% Nickel [8049-31-8; LT-1]; max 1% Chromium [7440-47-3; LT-P1].

SUBSTANCE NOTES: Alternate door and frame. This substance is considered essentially inert for the purposes of Pharos toxics scoring (Pharos CML). Total recycled content confirmed by suppliers for stainless steel is approximately 92% (22% pre-consumer and 70% post-consumer). Documentation from supplier provides the following composition for alloying elements that may individually exceed the declared threshold: max 27% Chromium [7440-47-3; LT-P1]; max 22% Nickel [7440-02-0; LT-1]; max 10% Manganese [7439-96-5; LT-P1]; max 4.4% Copper [7440-50-8; LT-UNK]; max 4.0% Molybdenum [7439-98-7; LT-UNK]; max 2.0% Aluminum [7429-90-5; LT-P1]; max 2.0% Silicon [7440-21-3; LT-UNK]; max 1.1% Tantalum [7440-25-7; LT-UNK]; max 1.0% Cobalt [7440-48-4; LT-1]; max 0.8% Columbium [7440-03-1; LT-UNK]; 0.7% Titanium [7440-32-6; LT-UNK]. Supplier statement confirms this product is free of mercury.

**Certification and Compliance Notes:** This product qualifies as an inherently non-emitting source per LEED, as ~99% of the product consists of powder-coated metal and/or plated or anodized metal. As per LEED, "Products that are inherently nonemitting sources of VOCs (stone, ceramic, powder-coated metals, plated or anodized metal, glass, concrete, clay brick, and unfinished or untreated solid wood) are considered fully compliant without any VOC emissions testing if they do not include integral organic-based surface coatings, binders, or sealants."

### Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
