RE: Sustainability Statement

Babcock-Davis certifies and provides the following information for use in achieving LEED v5 credit for specification of the following:

Product: Drywall Access Doors

Models: BRGB/BRGBR/BRGT

Final Assembly Location: Fort Myers, FL

LEED v5 Credit Contributions

Category: Materials and Resources

Credit: MRc3 – Low-Emitting Materials (2 Points Possible)

Babcock-Davis Drywall Access Doors are constructed of at least 75% powder coated, plated or anodized metal, which LEED considers inherently non-emitting sources of VOCs. The remaining 25% is gypsum board, which has received GREENGUARD Gold certification.

Category: Materials and Resources

Credit: MRc4 – Building Product Selection and Procurement (5 Points Possible)

Babcock-Davis has demonstrated achievement in two criteria areas for Drywall Access Doors:

- *Human Health:* A published, complete Health Product Declaration (HPD) is available for [Drywall Access Doors](#), with full disclosure of known hazards of all substances present at or above 100 ppm (0.01%) and Pre-Checked for LEED. [Score: 1]
- *Circular Economy:* Babcock-Davis Drywall Access Doors are constructed of at least 75% Aluminum Alloy, which includes 40-80% pre-consumer recycled content, and 10-30% post-consumer recycled content. [Score: Up to 1]
