RE: Sustainability Statement

Babcock-Davis certifies and provides the following information for use in achieving LEED v5 credit for specification of the following:

Product: GRATEdesign[®] Rigid Grille

Models: BGD74A

Final Assembly Location: Minneapolis, MN

LEED v5 Credit Contributions

Category: Materials and Resources

Credit: MRc3 – Low-Emitting Materials (2 Points Possible)

Babcock-Davis GRATEdesign[®] Rigid Grille is constructed of at least 98% powder coated, plated or anodized metal, which LEED considers inherently non-emitting sources of VOCs.

Category: Materials and Resources

Credit: MRc4 – Building Product Selection and Procurement (5 Points Possible)

Babcock-Davis has demonstrated achievement in two criteria areas for GRATEdesign[®] Rigid Grille:

- *Human Health:* A published, complete Health Product Declaration (HPD) is available for [GRATEdesign[®] Rigid Grille](#), with full disclosure of known hazards of all substances present at or above 1,000 ppm (0.1%) and Pre-Checked for LEED. [Score: 1]
- *Circular Economy:* Babcock-Davis GRATEdesign[®] Rigid Grille is constructed of more than 98% Aluminum Alloy (40-80% pre-consumer recycled content; 10-30% post-consumer recycled content. [Score: Up to 1]

Category: Indoor Environmental Quality

Prereq: EQp2 – Fundamental Air Quality (Requirement)

Babcock-Davis GRATEdesign[®] Rigid Grille can provide the permanent entryway system required by this prerequisite, in order to capture dirt and particulates entering the building at primary exterior entrances.
