RE: Sustainability Statement

Babcock-Davis certifies and provides the following information for use in achieving LEED v5 credit for specification of the following:

Product: Stainless Steel Entrance Grilles

Models: BGE38H/BGE58H/BGE98H, BGP34/BGP98

Final Assembly Location: Owensboro, KY

LEED v5 Contributions

Category: Indoor Environmental Quality

Prerequisite: Eqp2 – Fundamental Air Quality (Required)

Babcock-Davis Stainless Steel Entrance Grilles are permanent entryway systems intended to capture dirt and particulates entering the building at primary exterior entrances, which is required for this prerequisite.

Category: Materials and Resources

Credit: MRc3 – Low-Emitting Materials (2 Points Possible)

Babcock-Davis Stainless Steel Entrance Grilles are constructed entirely of Stainless Steel, which LEED considers an inherently non-emitting source of VOCs.

Category: Materials and Resources

Credit: MRc4 – Building Product Selection and Procurement (5 Points Possible)

Babcock-Davis has demonstrated achievement in two criteria areas for Stainless Steel Entrance Grilles:

- *Human Health:* A published, complete Health Product Declaration (HPD) is available for Babcock-Davis [Stainless Steel Entrance Grilles](#), with full disclosure of known hazards of all substances present at or above 100 ppm (0.01%) and Pre-Checked for LEED. [Score: 1]
- *Circular Economy:* Babcock-Davis Stainless Steel Entrance Grilles are constructed entirely of Stainless Steel Alloy, with 84.4% (Type 304) to 95% (Type 316) total recycled content. [Score: Up to 1]
