RE: Sustainability Statement

Babcock-Davis certifies and provides the following information for use in achieving LEED v5 credit for specification of the following:

Product: alumaGRIL Entrance Floor Grille

Models: BGL10

Final Assembly Location: Minneapolis, MN

LEED v5 Credit Contributions

Category: Materials and Resources

Credit: MRc3 – Low-Emitting Materials (2 Points Possible)

Babcock-Davis alumaGRIL Entrance Floor Grilles are constructed of at least 99% powder coated, plated or anodized metal, which LEED considers inherently non-emitting sources of VOCs.

Category: Materials and Resources

Credit: MRc4 – Building Product Selection and Procurement (5 Points Possible)

Babcock-Davis has demonstrated achievement in two criteria areas for alumaGRIL:

- *Human Health:* A published, complete Health Product Declaration (HPD) is available for [alumaGRIL Entrance Floor Grille](#), with full disclosure of known hazards of all substances present at or above 100 ppm (0.01%) and Pre-Checked for LEED. [Score: 1]
- *Circular Economy:* Babcock-Davis alumaGRIL Entrance Floor Grilles are constructed of 98-98.5% Aluminum Alloy (50% pre-consumer recycled content; 25% post-consumer recycled content) and 1-2% Steel Alloy (default 25% post-consumer recycled content). [Score: Up to 1]

Category: Indoor Environmental Quality

Prereq: Eqp2 – Fundamental Air Quality (Requirement)

Babcock-Davis alumaGRIL Entrance Floor Grilles can provide the permanent entryway system required by this prerequisite, in order to capture dirt and particulates entering the building at primary exterior entrances.
